

MEDBRIDGE DEMO DIAGNOSTICS

Synthetic laboratory report for capstone demonstration

TYPHOID SEROLOGY — WIDAL TEST

Patient	Rohan Mehta	MedBridge ID	MB-A-DEMO-005
Hospital Patient ID	A-DEMO-005	Report No.	LAB-B-2026-0822-005
Date of Birth	11-Jul-2000	Report Date	22-Aug-2026
Blood Group	AB+	Specimen	Serum

SYNTHETIC DEMO DATA — NOT FOR CLINICAL USE

Typhoid Serology Panel

Antigen	Result	Reference / Reporting Guide	Demo Interpretation
S. typhi O	1:80	<1:80	Borderline
S. typhi H	1:160	<1:80	Reactive
S. paratyphi AH	1:40	<1:80	Non-reactive
S. paratyphi BH	1:40	<1:80	Non-reactive

Report note

Widal results are synthetic demo data only. A single Widal result is not sufficient to establish or exclude typhoid fever; interpretation requires appropriate clinical context and, where indicated, confirmatory testing.

MedBridge interoperability context

This represents a separate fictional hospital/laboratory document for the same demo patient. The MedBridge demonstration shows how information from separate source systems can be associated with one unified patient identity.

Generated for MedBridge capstone demonstration.
Fictional data — not for diagnosis, treatment, or clinical decision-making.
